## Supporting Needs

“When a flower doesn’t  
bloom, you **fix the  
environment** in which it grows,  
not the flower.”

–Alexander den Heijer

FIRST! Reduce or eliminate barriers in place by reducing or eliminating barriers for everyone in the community

All plants  
need light

All plants  
need moisture

All plants  
need space

# Universal Design for Learning 3.0

All students  
need to be  
engaged

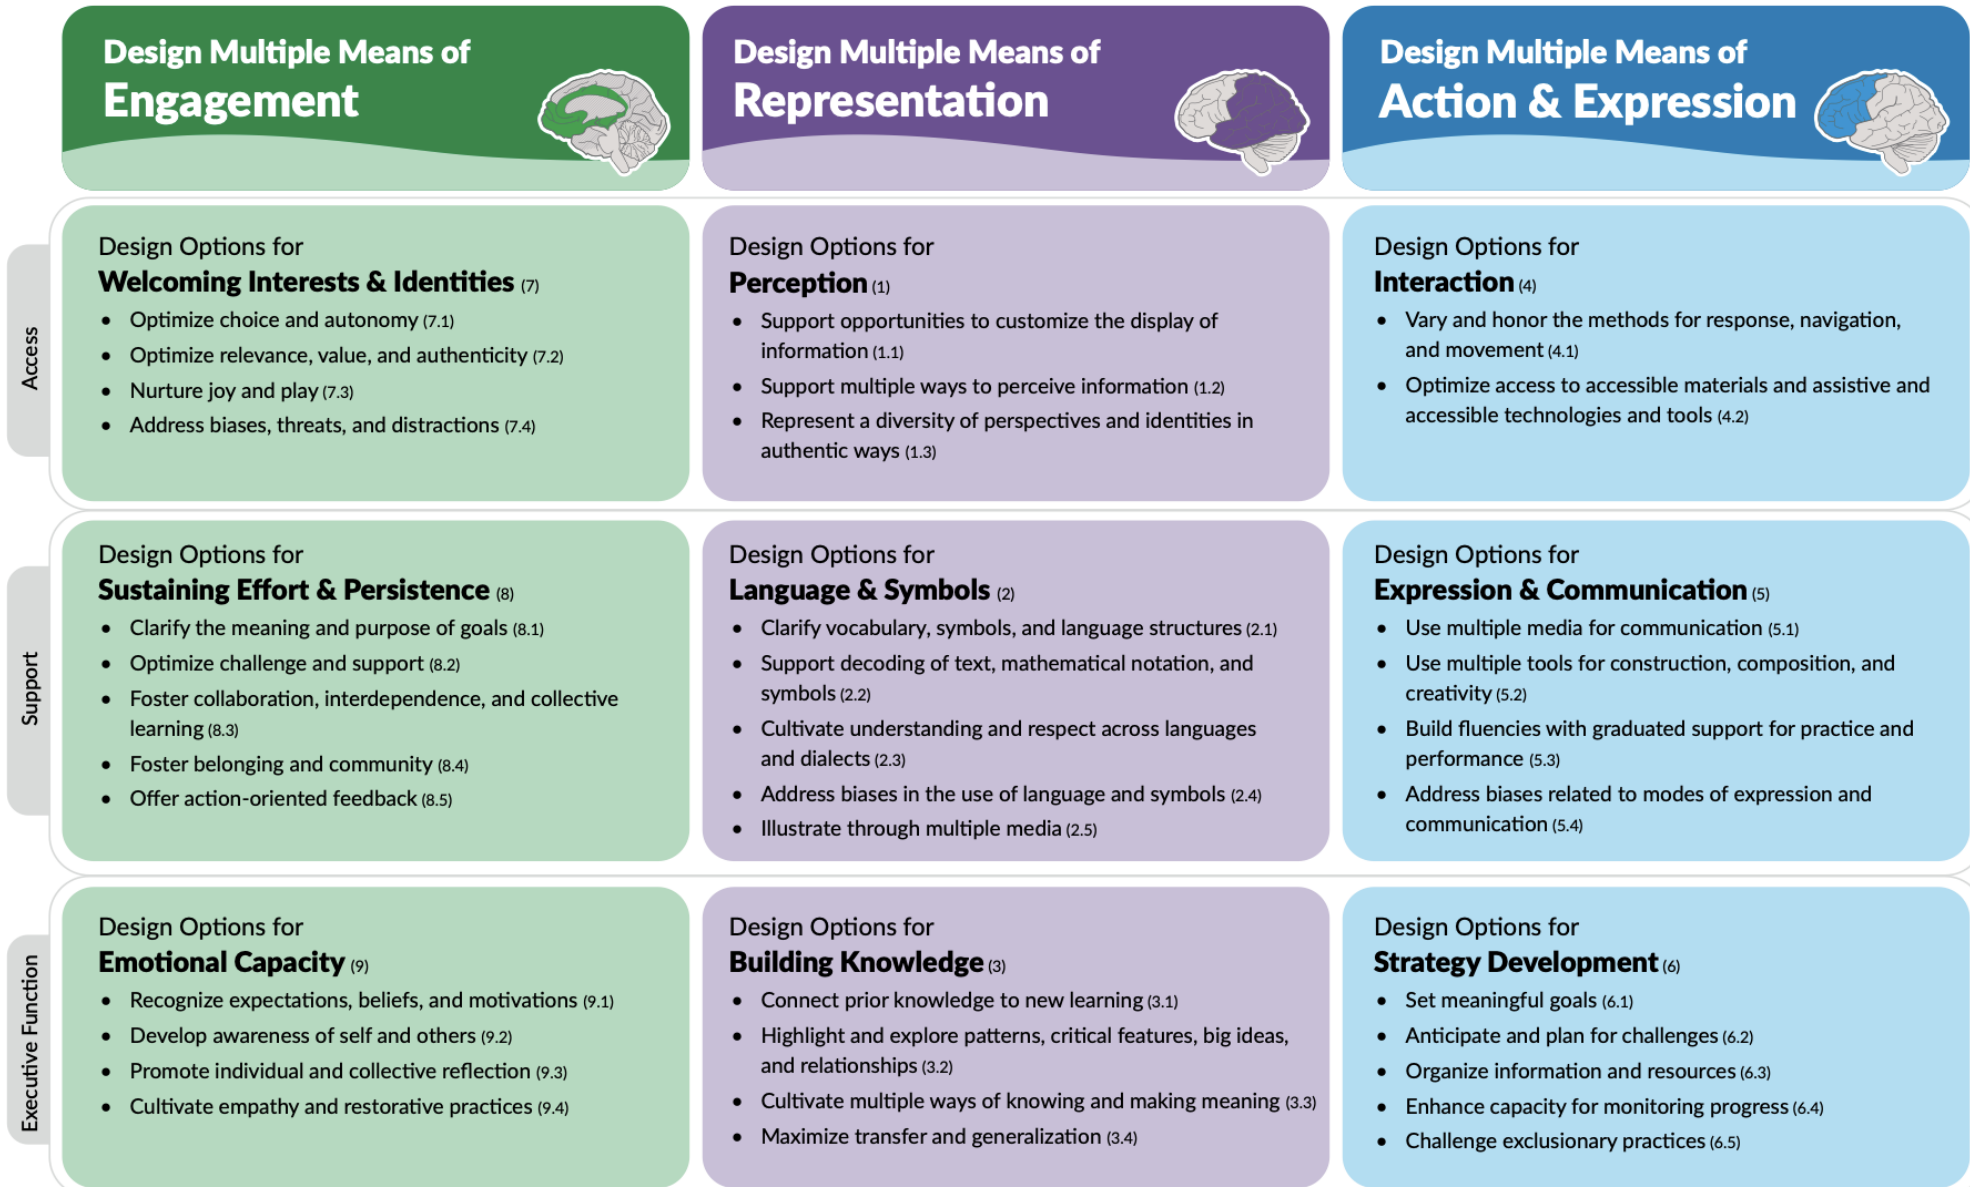

All students  
need to  
understand

All students  
need to show  
learning

# What universal supports & strategies can be taught to reduce barriers for everyone?

NEXT! Determine the needs of individuals and anticipate the supports & strategies that they will require in **universal** ways

Some plants need  
added nutrients

Some plants need  
companions

THEN! Determine the needs of individuals and anticipate the supports & strategies that they will require in **individualized** ways

A few plants may need very specific temperatures and humidity levels

Universal (Good for ALL; Taught to ALL):

- 4.2 – optimize access to accessible materials, assistive technologies and tools (teach all students about all technologies and tools)
- 5.2 – use multiple tools for construction, composition and creativity (teach all students how to use technologies and tools)
- 5.4 – address bias related to modes of expression (teach all students about people who use different technologies and tools)
